TECHNOLOGY, BUSINESS & SOCIETY

PARIS-CACHAN

Research Clinic

Anuradha Kar
2526 academic year

AI Clinic research projects

- 90/ 60 Hours of research work (10 ECTS Credits)
- Regular interaction with supervisors for guidance
- Aim is to do research on the topic and develop the solution as described in the project
- End goal- publish in conference/seminar/journal!

- 👤 Guardians of Science: A Tutorial for Ethical AI Developers
- 👤 Tutorial on a RAG-Powered Compliance Plug-In and Ethical AI tools
- 👤 Join Dr. Anuradha Kar and Likhita Yerra at EuroSciPy 2025 for a hands-on Python tutorial:

In this 90-minute session, you'll:

- ◆ Build a Retrieval-Augmented Generation (RAG) plug-in for automated compliance
- ◆ Learn vector search + documentation strategies
- ◆ Query regulatory standards like the EU AI Act & FAIR principles
- ◆ Explore bias auditing & reproducibility using a healthcare case study

Whether you're a data scientist, developer, or researcher, this workshop will equip you with the tools to embed ethics from the ground up in your ML pipelines.

👤 Automated chess analysis by [Likhita Yerra](#). It's awesome to see what people are building by chaining together models like YOLOv8, GPT4 and Google text to speech to give commentary on chess videos from YouTube so that beginners can understand what is happening.

⚡ Lightning talks are always a favourite and I think [Lucas Colley](#) blew everyone's minds the most by hacking around in the NumPy C code to make it do weird things and then recompiling it live on stage super quickly and easily using pixi.

📱 The Array API was a huge theme this year and it was great to have maintainers involved in the standard itself hanging out with folks from projects implementing it. There were folks from SciPy, NumPy, Dask, Blosc and more. You can't beat in person knowledge transfer and discussions like the ones happening in the hallway track.

If you've ever considered attending EuroSciPy you definitely should! Keep an eye out for 2026.

Planning and dates

Anuradha Kar

Choice of group and project

- Total of 15 research project options
- Topics: Agentic AI, climate prediction, AI for health, agriculture, robotics, federated learning
- Supervisors from aivancity and other institutes
- Project description on blackboard
- Max group size: 4 students
- 3 students will work on the research implementation, 1 student will focus on the research paper creation.
- Meetings during every alternance week

Blackboard®

Anuradha Kar

aivancity
PARIS-CACHAN

Today's task

1. Identify project
2. Identify group
3. Divide the work
4. Create an interaction schedule for every month when the group will meet in person or virtually and discuss the progress
5. Put the above under Discussions on blackboard

Open Preprint options

- At the end of the year, you will submit the paper to either :
 - Journal, conference, workshop
 - Preprint server

7 STEPS OF RESEARCH PROCESS

Anuradha Kar

How to do a literature review

1. Identify project
2. Start literature review

<http://www.youtube.com/watch?v=bhXA0emLH-k>

IMPORTANT; How to follow up with supervisor

1. 6th October, Introduction mail to supervisors
2. **Kick off meeting:** Students must write to supervisor to organize first meeting, coordinate time, keep me in cc
3. **Follow up meetings:** Fix at least one meeting every alternance week, coordinate time.
4. Intermediate meetings possible depending on supervisor availability
